## Balance Sheet and Cash Flow Results

Cash and cash equivalents, short-term investments, and restricted cash and investments balances increased slightly to $\$ 5.7$ billion at the end of the March 2024 quarter compared to $\$ 5.6$ billion at the end of the December 2023 quarter. The increase was primarily the result of $\$ 1,385$ million of cash generated from operating activities, partially offset by $\$ 981$ million of share repurchases, including net share settlement of employee stock-based compensation; and $\$ 263$ million of dividends paid to stockholders.

Deferred revenue at the end of the March 2024 quarter decreased to $\$ 1,746$ million compared to $\$ 1,928$ million as of the end of the December 2023 quarter. Lam's deferred revenue balance does not include shipments to customers in Japan, to whom title does not transfer until customer acceptance. Shipments to customers in Japan are classified as inventory at cost until the time of acceptance. The estimated future revenue from shipments to customers in Japan was approximately $\$ 107$ million as of March 31, 2024 and $\$ 157$ million as of December 24, 2023.

The March 2024 non-GAAP results also exclude expenses associated with the impairment of long-lived assets.

Management uses non-GAAP gross margin, operating expense, operating income, operating income as a percentage of revenue, net income, and net income per diluted share to evaluate the Company's operating and financial results. The Company believes the presentation of non-GAAP results is useful to investors for analyzing business trends and comparing performance to prior periods, along with enhancing investors' ability to view the Company's results from management's perspective. Tables presenting reconciliations of nonGAAP results to U.S. GAAP results are included at the end of this press release and on the Company's website at
