## Non-GAAP Financial Results

For the June 2018 quarter, non-GAAP gross margin was $\$ 1,502$ million or $48.0 \%$ of revenue, non-GAAP operating expenses were $\$ 507$ million, non-GAAP operating margin was $31.8 \%$ of revenue, and non-GAAP net income was $\$ 932$ million, or $\$ 5.31$ per diluted share. "Lam's June quarter results confirmed 2018 as the strongest fiscal year in our history, with over 11 billion dollars in revenues, approximately 18 dollars in non-GAAP diluted earnings per share and 2.7 billion dollars of cash generated from operations," said Martin Anstice, Lam Research's chief executive officer. "Essentially unsurpassed in our industry, the multi-year growth at Lam has been enabled by the increased prominence of Etch and Deposition in the semiconductor device manufacturing process flow and the broadening of our product and services portfolio over many years. Our forward-looking optimism is reinforced by the fundamental opportunity of silicon technologies, enabling a new generation of cognitive computing applications and services, combined with the expectation of sustainable investment by our customers, who in turn are pursuing inspiring and enhanced value creation agendas."

## Balance Sheet and Cash Flow Results

Cash and cash equivalents, short-term investments, and restricted cash and investments balances decreased to $\$ 5.2$ billion at the end of the June 2018 quarter compared to $\$ 6.7$ billion at the end of the March 2018 quarter. This decrease was primarily the result of $\$ 1.3$ billion of share repurchases, including net share settlement on employee stock-based compensation, combined with $\$ 817$ million of debt reductions, partially offset by $\$ 718$ million of cash generated in operating activities.
customer acceptance. Shipments to customers in Japan are classified as inventory at cost until the time of acceptance. The estimated future revenue from shipments to customers in Japan was approximately $\$ 607$ million as of June 24, 2018 and $\$ 526$ million as of March 25, 2018.
