This compares to non-GAAP gross margin of \$720 million or 46.6% of revenue, non-GAAP operating expenses of \$361 million, non-GAAP operating margin of 23.2% of revenue, and non-GAAP net income of \$315 million, or \$1.80 per diluted share for the June 2016 quarter.

"Lam delivered another record quarter in shipments, revenues and non-GAAP net income, validating the importance of having the right products at the right time to address industry enabling technology inflections that are critical to powering a new generation of semiconductor devices in a world that is now clearly, more than Moore," said Martin Anstice, Lam Research's President and Chief Executive Officer. "We continue to see strong momentum for differentiated products and services addressing key applications including multi-patterning, 3D device architecture and advanced packaging. The combination of our technology leadership, disciplined operational execution and close partnerships with customers positions us for our fifth straight calendar year of revenue growth of approximately 18% annually over that period, record performance in 2016 and a favorable forward looking multi-year growth outlook."

#### Balance Sheet and Cash Flow Results

Cash and cash equivalents, short-term investments, and restricted cash and investments balances increased to \$7.5 billion at the end of the September 2016 quarter compared to \$7.1 billion at the end of the June 2016 quarter. This increase was primarily the result of approximately \$473

million in cash flows from operating activities which was partially offset by approximately \$42 million of capital expenditures; and approximately \$48 million of dividends paid to stockholders during the September 2016 quarter. As a result of the October 5, 2016 termination of the Agreement and Plan of Merger and Reorganization with KLA-Tencor, our Senior Notes maturing in 2023 and 2026 were redeemed on October 13, 2016 under the Special Mandatory Redemption terms of the indenture governing these Notes, thereby reducing our cash and cash equivalents and short-term investments balance by approximately \$1.6 billion.

Deferred revenue at the end of the September 2016 quarter increased to \$704 million as compared to \$566 million at the end of the June 2016 quarter. Deferred profit at the end of the September 2016 quarter increased to \$418 million as compared to \$349 million at the end of the June 2016 quarter. Lam's deferred revenue balance does not include shipments to Japanese customers, to whom title does not transfer until customer acceptance. Shipments to Japanese customers are classified as inventory at cost until the time of acceptance. The estimated future revenue from shipments to Japanese customers was approximately \$65 million as of September 25, 2016.
