"While near-term market trends reflect adjustments after a period of tremendous growth in semiconductor demand, I am confident that our focus on Deposition and Etch technology leadership as well as growth in our installed-base business positions us well for the long term."

Balance Sheet and Cash Flow Results

Cash and cash equivalents, short-term investments, and restricted cash and investments balances remained steady at \$3.9 billion at the end of the December 2018 quarter as compared to the end of the September 2018 quarter. U.S. GAAP to non-GAAP reconciling items provided include only those items that are known and can be estimated as of the date of this release. Actual results will vary from this model and the variations may be material. Reconciling items included above are as follows:

Use of Non-GAAP Financial Results

In addition to U.S. GAAP results, this press release also contains non-GAAP financial results. The Company's non-GAAP results for both the December 2018 and September 2018 quarters exclude amortization related to intangible assets acquired through business combinations, restructuring charges, amortization of note discounts, tax benefit of non-GAAP items, and estimated income tax impacts associated with U.S. tax reform. Additionally, the December 2018 quarter non-GAAP results exclude income tax benefit on the conclusion of tax matters related to a prior business combination.

Management uses non-GAAP gross margin, operating expense, operating income, net income, and net income per diluted share to evaluate the Company's operating and financial results. The Company believes the presentation of non-GAAP results is useful to investors for analyzing business trends and comparing performance to prior periods, along with enhancing investors' ability to view the Company's results from management's perspective. Tables presenting reconciliations of non-GAAP results to U.S. GAAP results are included at the end of this press release and on the Company's website at <http://investor.lamresearch.com>.
