"Lam closed out calendar 2019 with strong December quarter results," said Tim Archer, Lam Research's President and Chief Executive Officer. "We are executing at a high level in an improving wafer fabrication equipment environment and building a powerful pipeline of new products to fuel future growth."

Balance Sheet and Cash Flow Results

Cash and cash equivalents, short-term investments, and restricted cash and investments balances decreased to \$4.9 billion at the end of the December 2019 quarter compared to \$5.8 billion at the end of the September 2019 quarter. This decrease was primarily the result of \$1.0 billion of share repurchases, including net share settlement on employee stock-based compensation, \$166.7 million of dividends paid to stockholders, and \$62.1 million of capital expenditures, partially offset by \$307.9 million of cash generated from operating activities.

Deferred revenue and deferred profit at the end of the December 2019 quarter decreased to \$411 million and \$366 million, respectively, as compared to \$481 million and \$407 million, respectively, at the end of the September 2019 quarter. Lam's deferred revenue balance does not include shipments to customers in Japan, to whom title does not transfer until customer acceptance. Shipments to customers in Japan are classified as inventory at cost until the time of acceptance. The estimated future revenue from shipments to customers in Japan was approximately \$91 million as of December 29,

2019 and \$47 million as of September 29, 2019.

Geographic Distribution

The geographic distribution of revenue during the December 2019 quarter is shown in the following table:

Region	Revenue
China	29%
Taiwan	26%
Korea	18%
United States	9%
Japan	8%

U.S. GAAP to non-GAAP reconciling items provided include only those items that are known and can be estimated as of the date of this release. Actual results will vary from this model and the variations may be material. Reconciling items included above are as follows:

- Gross margin as a percentage of revenue - amortization related to intangible assets acquired through business combinations, \$2 million.
- Operating income as a percentage of revenue - amortization related to intangible assets acquired through business combinations, \$14 million.

Use of Non-GAAP Financial Results

In addition to U.S. GAAP results, this press release also contains non-GAAP financial results. The Company's non-GAAP results for both the December 2019 and September 2019 quarters exclude amortization related to intangible assets acquired through business combinations, amortization of note discounts, and income tax benefit of non-GAAP items. Additionally, the December 2019 quarter non-GAAP results exclude the cumulative income tax benefit reversal due to the Ninth Circuit decision to deny a rehearing of the *Altera* stock-based compensation case and the September 2019 quarter non-GAAP results exclude restructuring charges.

Management uses non-GAAP gross margin, operating expense, operating income, operating income as a percentage of revenue, net income, and net income per diluted share to evaluate the Company's operating and financial results. The Company believes the presentation of non-GAAP results is useful to investors for analyzing business trends and comparing performance to prior periods, along with enhancing investors' ability to view the Company's results from management's perspective. Tables presenting reconciliations of non-GAAP results to U.S. GAAP results are included at the end of this press release and on the Company's website at <http://investor.lamresearch.com>.
