### **Balance Sheet and Cash Flow Results**

Cash and cash equivalents, short-term investments, and restricted cash and investments balances increased to \$4.7 billion at the end of the December 2015 quarter compared to \$4.5 billion at the end of the September 2015 quarter. This increase was primarily the result of approximately \$295 million in cash flows from operating activities which was partially offset by approximately \$13 million of treasury stock repurchases related to net share settlement on employee stock-based compensation; approximately \$28 million of capital expenditures; and approximately \$48 million of dividends paid to stockholders during the December 2015 quarter.

Deferred revenue at the end of the December 2015 quarter decreased to \$395 million as compared to \$517 million at the end of the September 2015 quarter. Deferred profit at the end of the December 2015 quarter decreased to \$261 million as compared to \$325 million at the end of the September 2015 quarter. Lam's deferred revenue balance does not include shipments to Japanese customers, to whom title does not transfer until customer acceptance. Shipments to Japanese customers are classified as inventory at cost until the time of acceptance. The estimated future revenue from shipments to Japanese customers was approximately \$109 million as of December 27, 2015.
